How To Easily Update Content On A Page

When logged into your WordPress site which you can access from your DigitalEasy.Cloud account, on your "Site Assistant" page, click "view site" in the upper right corner. Below is an example of what you should see. In the top black menu, click "edit page". You can go in and edit copy as you wish, replace imagery by clicking on the image and in the top menu clicking replace. Follow the prompts. You can add new content blocks by simply clicking the + under an existing block of content.
